Changing name of **END SEM** button to **Proceed to ROLAP Schema**

Step 2 Implementation of Conversion Algorithm and saving data in database.

Tables saved in the database after clicking on **Proceed to ROLAP Schema**

The screenshot shows a SQL query editor with the query: `SELECT * FROM INFORMATION_SCHEMA.TABLES WHERE TABLE_NAME LIKE '%%';`. Below the query, the "Results" tab is active, displaying a table with 5 columns: TABLE_CATALOG, TABLE_SCHEMA, TABLE_NAME, and TABLE_TYPE. The table lists 20 tables, all in the 'P1' catalog and 'dbo' schema, with 'BASE TABLE' as the type.
